

LẠI NGUYỄN VĨNH PHÚ

GAME DEVELOPER | UNITY • COCOS CREATOR

phulnv2001@gmail.com · phu-portfolio.vercel.app · 🎂 21 Jan 2001
Binh Thanh, HCM, Viet Nam

EDUCATION & CERTIFICATIONS

Bachelor of Computer Science

Majors: Computer Science
University Of Information Technology

Computational Thinking for Problem Solving Course

University of Pennsylvania

The TOEIC® Certificate of Achievement

740/990 (Listening - Reading)
300/400 (Speaking - Writing)
IIG Vietnam

ABILITIES

- **Game Engines:** Cocos Creator, Unity
- **Languages:** TypeScript, JavaScript, C++, C#
- **Tools:** Git, Jenkins
- **Database:** MongoDB
- **Frameworks:** ReactJS, NestJS
- **Other:** Spine Animation, PixiJS, Localization, Machine Learning (basic), Shaders

PROFESSIONAL EXPERIENCE

Gameloft Vietnam - Saigon

Aug 2022 - Feb 2023

C++ Game Programmer - Intern

I worked as a C++ programmer intern at Gameloft Vietnam. I learned a lot about C++ and how to work in a professional environment.

Mercury Studio

Sep 2023 - Nov 2025

Game Developer

I was a game developer at Mercury Studio. I worked with game designers and artists on game projects using Cocos Creator and Unity.

PROJECTS

Asphalt 9

Gameloft Vietnam - Saigon

Programming in C++: cooperate with game designers to develop new features, fix bugs, and refactor.
Maintain the build chain and workflow, working with Python scripts, batch scripts, Lua, etc.
Daily meetings with the A9 team to report working progress, discuss, and find solutions for tech problems.

Panda Master

Mercury Studio

A casino slot game developed with Cocos Creator.

- Built on the shared core framework for slot logic (reels, spins, bets, payouts).
- Collaborated with designers and 2D artists to implement unique gameplay features.
- Implemented panda character animations and skill-trigger logic that award players special bonuses.
- Created dynamic visual effects such as fireballs, Tai Chi stance lights, and other VFX.
- Integrated server communication to trigger animation events based on real-time game data.
- Optimized the asset loading pipeline for smoother runtime performance.

Assets Localizing Tools

Mercury Studio

A set of TypeScript tools to streamline localization workflows for game assets.

- Automated the process of setting up localized images, fonts, and Spine animations.
- Ensured the correct assets load dynamically based on language configuration at runtime.
- Reduced manual setup time for localization by standardizing asset folder structures and metadata.

Build - Version Control Web Tool

Mercury Studio

An internal ReactJS + NestJS + MongoDB web application for managing builds and version control.

- Created a user-friendly dashboard to build, upload, and tag game versions automatically.
- Integrated with Jenkins Jobs to handle build automation and server deployment.
- Implemented real-time build tracking and status updates for developers and managers.
- Resolved challenges with varying Jenkins parameter formats and asynchronous build workflows.

Gao Gae - Cards game

Mercury Studio

A poker-style multiplayer card game developed using Cocos Creator.

- Designed and implemented a responsive, animated UI using Spine and tween effects.
- Built a localization system for textures, Spine assets, texts, and audio to support multiple languages.
- Integrated with backend servers to handle complex round flow and game state synchronization.
- Ensured stable gameplay through error handling, data validation, and reconnection logic.

Pet Projects

Personal

In order to learn Unity and Game Development, I did some projects that applied many techniques so that I could learn and remember the knowledge better. I learned things through those projects, like Unity physics, 3D rendering, 2D rendering, shader graphs, VFX graphs, game programming design patterns, etc.

Here are some of my personal projects and their demos:

- Mummy Maze (Unity 3D): <https://github.com/phutaekwondo/mummy-maze-clone>
- Flappy Bird (C++): <https://youtu.be/5E6iAwEELds>
- Dr. Strange Portal: <https://youtu.be/HCGWXQIJSbM>
- Smash the Capsule: <https://macteo.itch.io/smash-the-capsule>
- 3D Pool: <https://youtu.be/-G8uWSB-JOg>
